

Using the NJSLA–S 2022 Grade 5 Braille Test Booklets for Computer-Based Testing

Braille kits are provided for students who use a screen reader with the computer-based test. However, the item numbering may differ between the braille test booklet and the computer-based test. Test administrators should use the following charts with students who require the screen reader accommodation during computer-based testing. These charts, one for each unit, will help the test administrator assist the student in locating the braille items and tactile graphics associated with each item.
